The Company Announcements Office  
Australian Securities Exchange Limited

## **QUARTERLY ACTIVITIES REPORT TO 31 DECEMBER 2008**

### ***Highlights***

***With our Waite Kauri nickel/cobalt project now Joint Ventured out, Eagle Eye has intensified its search for gold.***

***Original Prospectus gold areas at Leonora/Laverton show high prospectivity and are targeted for further exploration, including drilling.***

***Cash outflows for the quarter down to less than \$50,000 per month, over \$2.5million cash reserves, very little debt.***

***Sound financial position and small share capital base sees the Company attracting offers to participate in substantial gold, coal, uranium and base metals ventures in Australia and offshore.***

***Coffey Mining South Africa geological consultants appointed.***

The world's financial crisis has not prompted any major shift in Eagle Eye's exploration and development policy since Listing on ASX in late 2006. The continuing policy is to carefully research and assess our projects before implementing expensive exploration work, so as to get the best results for the minimum possible expenditure.

The Company's total cash expenditure for the quarter was kept down to \$140,000 at a monthly cash outflow of less than \$50,000. These savings were due in part to the Company's Waite Kauri nickel/cobalt project being successfully Joint Ventured out to Poseidon Nickel Limited in the September 2008 quarter.

Eagle Eye was originally intended as a primarily gold search Float. This well fits the founders and Directors considerable knowledge in this metal and the acquisition of a portfolio of excellent mostly gold prospects in the Leonora/Laverton region of the North Eastern Goldfields of Western Australia, a world renowned gold producing area. However, initial search focus was deliberately shifted to the Company's Waite Kauri nickel/cobalt project due to a massive increase in world demand and price for these metals. Now that this project has been Joint Ventured out, we are focusing strongly on gold opportunities, certainly a preferred metal in these troubled economic times.

As outlined in the following Consulting Geologist's report, the Company is now working up exploration and drilling programs for implementation on it's highly prospective Western Australian gold exploration projects at Apollo Hill, Erlistoun, Little Doris, Wandry Well and Randwick.

With a sound financial position and a relatively small share capital structure, Eagle Eye is continually receiving approaches from other explorers and their broker/financial adviser representatives seeking to vend in mining projects. These opportunities are being carefully assessed by our well experienced mining industry Directors, in conjunction with our consulting geologists Rocworth Consulting in Australia. We have also recently appointed world recognized consultants Coffey Mining in South Africa to review and advise on projects in that region on offer to Eagle Eye.

## **CONSULTING GEOLOGIST'S REPORT BY ROCWORTH CONSULTING**

### **Leonora/Laverton gold projects**

The widely publicised financial crisis gripping the world's economies has only acted to reinforce the importance of Eagle Eye's long standing exploration strategy of ensuring that any exploration activity funded by the Company is undertaken in the most cost-effective manner possible. This strategy has seen Eagle Eye maintain a sound financial position whilst advancing it's most prospective projects.

The financial crisis has also placed Eagle Eye in a good position for 2009 from an exploration perspective. Whilst the gold price continues to maintain its high level due in large part to the world embracing gold as a safe haven, the cost of most exploration activities (including the cost of drilling) has fallen considerably. Therefore, at no time in the recent past has gold exploration been on a more attractive cost basis. Consequently, last quarter Eagle Eye undertook a comprehensive review into the gold prospectivity of all its projects, including preparation of cost budgets required to advance the projects offering the highest potential of hosting economic gold mineralisation.

The results of this review Eagle Eye confirmed the attractiveness of the Company's Apollo Hill, Erlistoun and Little Doris gold projects, with these targets forming the basis of initial exploration endeavours for 2009, including targeted drilling campaigns.

The potential of Eagle Eye's Wandry Well and Randwick projects to host economic gold mineralisation was also elevated as a result of the review. Work programs are presently being complied for these two additional prospective gold projects for possible inclusion in next quarter's exploration campaign.

## Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
