The Company Announcements Office
Australian Securities Exchange Limited

QUARTERLY ACTIVITIES REPORT TO 30 JUNE 2011

HIGHLIGHTS

Corporate

- Acquisition of 100% of unlisted Birimian Gold Limited completed – providing the Company considerable exposure to several highly prospective gold projects in West Africa.
- Board of Directors restructured to focus on West African Gold.
- \$3.4 million raised through placements and a rights issue.

West African Gold Projects

- Maiden RC drilling program completed at the Dankassa Gold Project in Mali. Analytical results for all drill holes are pending.
- Reconnaissance licence covering 1,131km² over the highly prospective Basawa Gold Project in Liberia granted.

WEST AFRICAN GOLD PROJECTS

Dankassa Gold Project, Mali

The Dankassa Gold Project comprises three permits covering a total of approximately 450km² in southern Mali (see Figure 1). Previous operators delineated extensive gold in soil anomalism at the Project (see Figure 2). Despite this very limited follow-up work has been undertaken.

The most advanced prospect within this Project is the Kourouba Prospect. Previous operators have delineated a coherent, 5,000 metre long gold in soil anomaly here (see Figure 3). This anomalism has been subjected to very limited previous drilling – 58 RC holes had been drilled previously, on very broadly spaced centres (between 250 and 1000 metres apart). Despite this very limited drill evaluation, very encouraging results were returned, including:

- 10m @ 5.75 g/t Au
- 12m @ 1.81 g/t Au
- 14m @ 1.76 g/t Au
- 40m @ 1.06 g/t Au (incl 10m @ 1.63 g/t Au)
- 20m @ 2.17 g/t Au

During the June quarter Eagle Eye Metals Limited (ASX:EYE, “Eagle Eye” or “the Company”) successfully completed its maiden reverse circulation (RC) drilling program at the Dankassa Gold Project. This drill program extended the drill coverage north and south of the previous ore grade drill intercepts, targeting an 800 metre long zone within the larger 5,000 metre geochemical anomaly. 24 RC holes were completed for a total of 2,400 metres. Analytical results from all holes are pending.

Basawa Gold Project, Liberia

During the quarter the Company was granted a reconnaissance licence covering 1131km² at the Basawa Gold Project in south-eastern Liberia (see Figure 4).

The Project area covers rocks of the Birimian Greenstone Terrane – the highly prospective geological formation that hosts world-class gold deposits within West Africa. Numerous gold occurrences, both hard rock and alluvial, have been documented within the licence area.

During the quarter a reconnaissance of the Project was undertaken by helicopter. Significant artisanal mining activity was evident at more than 8 locations within the licence area. The Company is not aware of any previous modern exploration activities at any of the identified gold occurrences.

Surface sampling and mapping programs are planned in the near future to further define prospective areas for eventual drill testing.

AUSTRALIAN GOLD PROJECTS

Eagle Eye holds 100% interests in a nickel/cobalt project and seven gold projects in the Leonora/Laverton region of the Eastern Goldfields of Western Australia. No activity was undertaken at these projects during the quarter.

With the Company now firmly focused on its West African assets, the Company is formulating a strategy to divest these assets.

CORPORATE

Acquisition of Birimian Gold Limited

During the quarter the Company completed the acquisition of 100% of the shares in unlisted Birimian Gold Limited. This acquisition provides the Company with substantial interests in numerous highly prospective gold projects in Mali and Liberia.

Following this acquisition, and in line with the Company’s new focus on developing these West African gold assets, Kevin Joyce was appointed Managing Director, Hugh Bresser was appointed Non-Executive Chairman and Mike Haynes was appointed Non-Executive Director. These new directors, particularly Kevin Joyce who was formerly the Exploration Manager, Mali for Resolute Gold Limited, bring considerable West African knowledge and expertise to the Board.

Capital Raising Program

The Company is now well financed to continue to aggressively explore its gold projects in West Africa and to continue to assess new opportunities to continue to grow the business.

Aphrodite Gold Limited Option

In April 2010 Aphrodite Gold Limited (ASX:AQQ) granted Eagle Eye Metals Limited an option to acquire a 20% contributing interest in the Aphrodite Gold Project (the Option). This Option was exercisable by 30 June 2011. Consideration to exercise the Option comprised a cash payment of \$1.44 million plus reimbursement of 20% of the direct exploration and development costs incurred by Aphrodite Gold Limited on the Aphrodite Gold Project.

On 30 June 2011 Eagle Eye Metals Limited elected not to exercise this Option.

Eagle Eye continues to own 11.85 million shares (8.9%) and 5.925 million options in Aphrodite Gold Limited, hence remains a major shareholder in that Company and continues to have considerable exposure to the potential of the Aphrodite Gold Project.

New Project Opportunities

The Company continues to actively seek new gold projects in West Africa.

Competent Persons Declaration

The information in this announcement that relates to exploration results is based on information compiled by or under the supervision of Kevin Anthony Joyce. Mr Joyce is Managing Director of Eagle Eye Metals and a Member of the Australian Institute of Geoscientists. Mr Joyce has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and the activity he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves” and a Qualified Person as defined in the Canadian National Instrument 43-101 (standards of disclosure for Mineral Projects). Mr Joyce consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
